

The Mini 8, a 15mm (1/2") gear-drive rotor, serves as the perfect in-between fit for your applications where the landscape is too big for sprays, but too small for a full-size rotor. When using a 15mm (1/2") rotor, you can water efficiently, thereby saving money (and water). The cost to irrigate is less and compared to fixed-sprays, it requires fewer stations to cover an area.

Add Mini 8 to your fixed spray and rotor offering and have all the tools you need to irrigate residential and commercial landscapes most efficiently and effectively.
